

Information sheet for the course

Project in design of machine parts and mechanisms

University: Alexander Dubček University of Trenčín												
Faculty: Faculty of special technology												
Course unit code: MŠT/B/4-47/d	Course unit title: Project in design of machine parts and mechanisms											
Type of course unit: compulsory												
Planned types, learning activities and teaching methods:												
1 hour seminar per week, attendance teaching method.												
Number of credits: 2												
Recommended semester: 6 th semester in the 3 rd year (full-time) 7 th semester in the 4 th year (part-time)												
Degree of study: I. (bachelor)												
Course prerequisites: none												
Assessment methods:												
Final assessment: 100% participation in exercises, processing, submit and evaluation of semester assignments.												
Learning outcomes of the course unit:												
Student can effectively analyze using the acquired complex knowledge and strengthening of logical thinking in individual assignments and a semester project.												
Course contents:												
Elaboration individual of semester project, formal and contentual aspect of the project, implementation design, software tools to solve, technical documentation.												
Recommended of required reading:
