Information sheet for the course
Laboratory practice III.

University: *Alexander Dubček University of Trenčín*	
Faculty: *Faculty of Health Care*	
Course unit code: *LabPx3/d*	**Course unit title:** *Laboratory practice III.*
Type of course unit: *compulsory*	
Planned types, learning activities and teaching methods: *Practice*: 32 *hour weekly/ 416 hours per semester of study; full-time*	
Number of credits: 5	
Recommended semester: *5th semester in the 3rd year (full-time)*	
Degree of study: *I (bachelor)*	
Course prerequisites: *Laboratory practice II., Continuous Laboratory Practice II.*	
Assessment methods: *A student obtains credits after completion of the prescribed number of hours given to specialized work during laboratory practice. The practical tasks given to students by co-operating external mentors from the partner laboratory workplace, must be managed. A student can obtain maximum of 40 points. For active participation a student obtains maximum of 10 points. All together 50 points for the course.* *To obtain A, a student must score at least 45 points, to obtain B, a student must score at least 40 points, to obtain C, a student must obtain at least 35 points, to obtain D, a student must obtain at least 30 points, and finally to obtain E, a students must to obtain at least 25 points.*	
Learning outcomes of the course unit: *Based on the knowledge gained from successful completion of the course "Laboratory practice II", a student gains routine manual skills in in the basic disciplines of laboratory examination methods within health care, with the emphasis put on clinical histopathology, haematology and transfusiology. A student acquires knowledge and skills necessary to conduct independent calibration of analytical methods and quality management.*	
Course contents: 1. *Sample receipt to the laboratory – general rules of sample management.* 2. *Types of samples and their identification, specifications of microbiological samples.* 3. *Rules of pre-analytical sample preparation and transport.* 4. *Laboratory part of pre-analytical phase of sample processing.* 5. *Patient identifiers.* 6. *Rules and conditions of laboratory samples refusal.* 7. *Laboratory spinning.* 8. *Calculations RCF – RPM and possible disagreements, or differences in their application.* 9. *Methodological Principles of laboratory tests, cultivation techniques.* 10. *Laboratory analysers – general principles of their operation.* 11. *Laboratory specific standard operating procedures carried out in a given laboratory workplace.* 12. *Laboratory test results – in general.*
