

Information sheet for the course

Nursing Research I.

University: Alexander Dubček University of Trenčín																									
Faculty: Faculty of Health Care																									
Course unit code: OseVyskI/d	Course unit title: Nursing Research I.																								
Type of course unit: compulsory																									
Planned types, learning activities and teaching methods:																									
Lecture: 1 hour weekly/13 hours per semester of study; full-time																									
Seminar: 1 hour weekly/13 hours per semester of study; full-time																									
Supervised practical output: 5 hours weekly/65 hours per semester of study; full-time																									
Number of credits: 4																									
Recommended semester: 2 nd semester in the 1 st year (full-time)																									
Degree of study: II (magister)																									
Course prerequisites: none																									
Assessment methods:

55 - 51 points	B																								
50 - 46 points	C																								
45 - 41 points	D																								
40 - 36 points	E																								
35 - 0 points	FX																								
Learning outcomes of the course unit:																									
<ol style="list-style-type: none"> 1. <i>DEFINE nursing research.</i> 2. <i>RESPECT ethical principles of research.</i> 3. <i>CHARACTERIZE the types of research.</i> 4. <i>USE library databases.</i> 5. <i>SELECT a research design.</i> 																									

Course contents:**Lectures:**

1. *Nursing as a science.*
2. *The scientific concepts. Primary and secondary sources and triangulation.*
3. *The research problem.*
4. *Hypotheses.*
5. *The research sample.*
6. *Research design.*
7. *Questionnaire as a method of research. .*
8. *Interview as a method of research.*
9. *Observation as a method of research.*
10. *Experiment as a method of research.*
11. *Validity and reliability of research instruments.*
12. *Qualitative research.*
13. *Qualitative research methods.*

Seminars:

1. *The choice of the research topic.*
2. *Background - the collection and processing of information sources. Types of scientific publications, library databases. Ethics and data protection.*
3. *Research questions.*
4. *Formulating clinical research hypotheses.*
5. *Selection criteria of the research samples.*
6. *Research design.*
7. *Creation of the questionnaire.*
8. *Training of the research interviewer.*
9. *Use of observation method in research.*
10. *Use of experiment method in research.*
11. *Use of tests of knowledge and skills in research.*
12. *The use of case studies in nursing research.*
13. *Analysing qualitative research data.*
