

# > Summer internship for university students

June, 27<sup>th</sup> – August, 5<sup>th</sup>, 2022

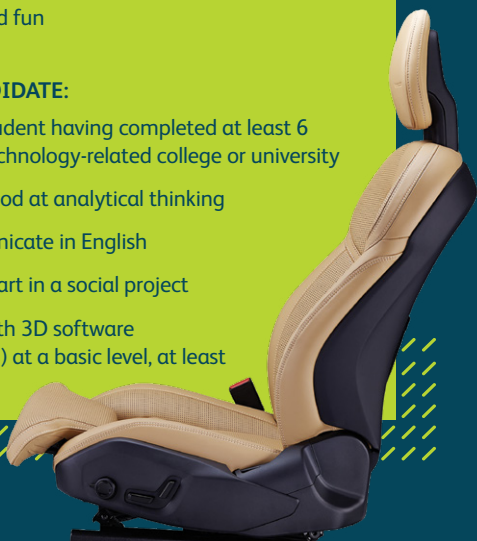

We are looking for 10 creative students, who would be interested to work in the future as engineers or programme managers in one of our European development teams. The internship programme is planned to take place in Trenčín, in the Adient Trenčín Technical Center.

## WHAT THE APPLICANTS CAN EXPECT?

- > a challenge in the form of solving actual technical problems in car seating development and a possibility to learn about each constituent part in detail
- > a possibility to help handicapped children by working on a special project
- > expert guidance by experienced engineers
- > presentation of project results in English
- > a “soft skills” training
- > team building and fun

## A SUITABLE CANDIDATE:

- > is a motivated student having completed at least 6 semesters at a technology-related college or university
- > is creative and good at analytical thinking
- > is able to communicate in English
- > is eager to take part in a social project
- > is able to work with 3D software (ideally CATIA V5) at a basic level, at least

## WHAT DO WE HAVE TO OFFER?

- > accomodation and lunch during the entire time of the internship, covered by our company
- > financial bonus included
- > training of technical and non-technical skills
- > certificate of completion
- > a possibility to work on a thesis under the mentorship of a selected mentor, possibly even a job offer
